

Thanks for downloading our tiled calendar!

Use these instructions to make it a snap to assemble and post on your wall.

Instructions

	<p>Start with the first row of pages. (Pages 1 and 2)</p>
	<p>Cut the second page along the dotted lines.</p>
	<p>Apply glue to the colored area on the right side of the first page. Attach the second page to this area. (There will be a little bit of overlap, but that's ok! This ensures that your calendar will look great when finished.)</p>
	<p>Repeat these steps for the second row. (Pages 3 and 4)</p>
	<p>Once both rows are assembled, apply glue to the colored area at the bottom of the first row. Attach the second row to this area.</p>
	<p>Trim the outside edges and you're finished!</p>

Trim edges once all pages are glued together

NASA Space Astronaut

20

2019/SEPTEMBER

Trim edges once all pages are glued together

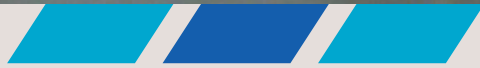

Trim edges once all pages are glued together

	Sun	Mon	Tue	Wed
	1 Labor Day	2	3	4
More than 10% of Iceland is covered by glacial ice.			There are no "air waves" in space to conduct sound, so there is no noise in space.	More energy from the sun hits the Earth every hour than the planet uses in a year.
8	9	10 Patriot Day	11	12
Billions of neutrinos pass through human fingernails every second.		Starfish lack a centralized brain.		
15	16	17	18	19
Hopeful astronauts must complete a minimum of 1,000 hours of flying time in a jet aircraft to even be considered by NASA.	Rain forests cover less than 2% of the Earth, but more than 50% of the Earth's plants and animals call the rain forest their home.		On average, alligators have 75 teeth.	
22	23	24	25	26
Human bones are stronger than concrete.	Coral reefs are colorless; they get their color from the algae they host.			
29	30			

"If you wish to travel far and fast, travel light. Take off all your envies, jealousies, unforgiveness, selfishness, and conceits."

	Wed	Thu	Fri	Sat	
		A toucan's bill is mostly composed of air.	When manatees take a breath, they replace approximately 90% of the air in their lungs.		
	4	5	6	7	
More energy from the sun hits the Earth every hour than the planet uses in a year.		When hydrogen burns in the air, water is formed.	Hot water freezes quicker than cold water.	Some snails can sleep for three years.	
Patriot Day	11	12	13	14	
		If two pieces of the same type of metal touch in space, they will bond and be permanently stuck together.		The hardest substance within the human body is tooth enamel.	
	18	19	20	21	
On average, alligators have 75 teeth.			Glaciers store almost 75% of all the Earth's freshwater and if all that ice melted, sea levels would rise over 230 feet worldwide!	The Everglades is a river that's 50 miles wide.	
	25	26	27	28	

Trim edges once all pages are glued together

es, unforgiveness, selfishness and fears." – Cesare Pavese
